projection

Moving Sketchbook

A little world I always carry with me.

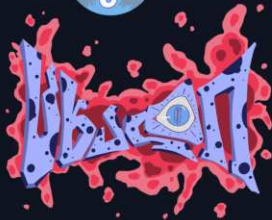

ILLUSTRATIONS

In my illustrations I dive deep into the complexity of emotions and try to express them visually.

ILLUSTRATIONS

Graffiti

"Tskhadi" a word from Georgian that means "obvious truth" or "obvious reality".

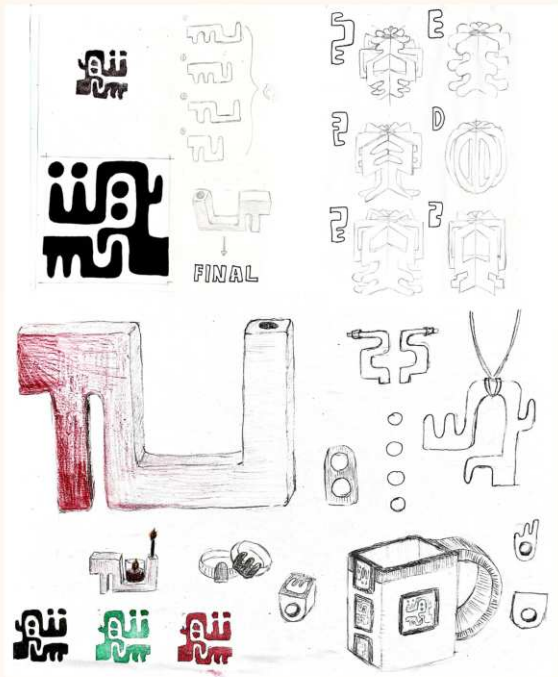

In Tbilisi, I often saw graffiti where a single word kept popping up, hitting you right in the face with its meaning. That feeling when a word carries weight and clarity, constantly reminding you of something, has always brought me joy.

That's exactly why I chose this word. For me, graffiti isn't just art; it's a playful exploration of language and meaning, a hobby where creative shapes emerge from words.

From Stamp to Shape

This project explores designing objects created solely from the shape of a stamp design I developed.

Political Art: Solidarity with Georgia

When the protests began in Georgia in 2024, art became my voice of protest. Through my illustrations, I stand with my people, expressing solidarity and resistance.

Thank you!
